

# TD I-Series®

## Unlock possibilities

TD I-Series is a communication device that can be purchased with the world's leading eye tracker. Purpose-built for people with conditions such as cerebral palsy, Rett syndrome or ALS, this Windows-based device can be controlled with one's eyes to communicate and live more independently. Available in two sizes: TD I-13 & TD I-16.

### Multiple access methods

Control TD I-Series with your eyes, your fingers or a switch.

### Partner Window

Converse face-to-face by displaying the text you type.

### Outdoor use

Access everything on your device, indoors and even outdoors.

### Powerful speakers

Project your voice clearly with strong built-in speakers.

## Communicate with your eyes

TD I-Series is the lightest, fastest and most durable speech generating device purpose-built for augmentative and alternative communication. It can be controlled via eye gaze in all kinds of lighting conditions, even outdoors. TD I-Series comes pre-loaded with AAC software to meet a range of communication needs, and projects a synthetic voice loud and clear thanks to powerful speakers. The device also offers a rear-facing Partner Window for more natural face-to-face conversations.

## Included software

### TD Snap

A symbol-supported AAC software offering a choice of solutions, complete with tools and resources.

### Communicator 5

An AAC solution designed to help literate individuals with language disabilities communicate more efficiently.

### TD Control

A way to control Windows with just your eyes on a TD I-Series or PCEye device.

### TD Browse

A way to browse the web intuitively using just your eyes on a TD I-Series device.

### TD Phone

A way to text and call using just your eyes on a TD I-Series device.

### TD Talk

A simple text-to-speech app that enables natural conversation using just your eyes or hands.

## Accessories

TD I-Series comes with several accessories included in the box, which are also available to buy separately as spares or replacements.
