#### Motor Plan Print Communication Book

The Motor Plan Print Communication Book is a paper version of the Motor Plan page set from the TD Snap AAC app. It includes the same vocabulary, symbols, and layout found in the app. For more information on the app, visit <a href="https://www.tobiidynavox.com">www.tobiidynavox.com</a>.

An editable template for creating additional pages is available at <a href="https://www.myboardmaker.com">www.myboardmaker.com</a> in the Community Activities section (search for 'MotorPlan').

#### **How to Use the Communication Book:**

The communicator can select a word or category on the page by touching their selection. Categories have a number inside a colored circle in the corner. If the communicator selects a category, flip to the page with that number. If they select Home, flip to the Home Page (the first page of the book).

If the communicator is unable to touch the board directly, use partner assisted scanning, a method of alternative communication in which a partner presents choices sequentially until the communicator indicates their need or preference. Before using these boards, the communicator and their partner should agree on how to indicate a "yes" response. It could be a facial expression, eye blink, gesture or vocalization—whatever is most comfortable for the communicator.

#### **How to Construct the Communication Book:**

- 1. Print out the pages of the book. Feel free to leave out any pages that you feel are not important.
- 2. Cut out along the dotted lines on the bottom edge of the page, leaving only the tab that indicates the page number and title.
- 3. Laminate the pages.
- 4. Cut away the bottom edge except for the tab. Leave a narrow edge of laminate all around for durability and to keep moisture out.
- 5. Assemble the pages in order.
- 6. Bind the pages along the top edge using snap rings, brads, a comb binder, or other method.
