

# TD Pilot

## Pursue your passion

TD Pilot is a communication device for iPad that can be controlled with a person's eyes. Designed to empower people with conditions such as ALS, spinal cord injury or cerebral palsy to communicate and use their favorite apps, this iPadOS-based speech generating device can be purchased with the world's leading eye tracker.

### Multiple access methods

Control an iPad with your eyes, your fingers or a switch.

### Partner Window

Converse face to face by displaying the text you type.

### Outdoor use

Access everything on your iPad, indoors and even outdoors.

### Powerful speakers

Project your voice clearly with strong built-in speakers.

Apple, iPad, iPad Air, and iPad Pro are trademarks of Apple Inc., registered in the U.S. and other countries.

## Control an iPad with your eyes

Connect on social media, play games, listen to music or simply join a conversation with TD Pilot. This iPad-based AAC device enables communication and full use of iPadOS apps via eye control and other access methods.

## Included software

### TD Talk

A simple text-to-speech app that enables natural conversation using just your eyes or hands.

### TD Snap

A symbol-supported AAC software offering a choice of solutions, complete with tools and resources.

### TD CoPilot

A companion app to TD Pilot providing calibration, software updates and battery status.

## Accessories

TD Pilot devices come with several accessories included in the box, which are also available to buy separately as spares or replacements.
